

## PF Range RFI Suppression Filter for Phase Angle Controllers

PF Range of RFI filter is specially design to reduce the radio frequency interference generated by a phase angle power controller, such as a PA300, PA310, PC225 or PC527.

When a phase angle controller is used together with a PF filter, the electrical noise produce by a phase angle controller will be reduce to a level which can meet the EMC requirement, EMC generic standard, EN 50081.

The maximum supply voltage is 265Vac and max. current ratings are 10A, 15A and 25A at 40 degree C ambient.

### Dimension:

	Width	Height	Depth	Mounting Pitch
PF10A	41mm	74mm	35mm	61mm
PF15A	61mm	92mm	45mm	80mm
PF25A	70mm	125mm	55mm	115mm
